Professional Summary

Results-driven Full-Stack Web Developer with hands-on experience building scalable REST APIs, real-time applications, and modern web interfaces using Node.js, React, and Next.js. Adept at end-to-end delivery spanning backend architecture, responsive front-ends, database design, and workflow automation. Passionate about open-source projects and continuously expanding skills across modern web technologies.

Technical Skills

Languages	JavaScript, TypeScript, Python, Java
Frontend	React.js, Next.js, HTML5 / CSS3, Tailwind CSS, jQuery
Backend	Node.js, NestJS, Express.js, Django
Databases	MongoDB, MySQL, MSSQL
Tools	Git, Postman, Selenium, Socket.IO, Linux, Cloudinary, Firebase

Work Experience

- Nov 2022 – Jan 2023 **Back-End Developer Intern (Remote)**, AGILE RECRUTECH PVT. LTD., Hyderabad, 3 Months.
- **PDGMS** (Personality Development & Growth Management System): Developed RESTful APIs for user profiles, leave tracking, and automated salary report generation on the admin panel.
 - Reviewed and debugged code, resolved issues, and improved overall API reliability.
 - Collaborated with cross-functional stakeholders to identify pain points and deliver feasible technical solutions.
- Mar 2022 – Jun 2022 **Django Developer Intern**, HEPTARISE IT SOLUTIONS PVT. LTD., Raipur, 3 Months.
- **Petcare Web App**: Contributed to a JustDial-style pet service platform enabling owners to search, locate, and book vet/grooming appointments seamlessly.
 - Implemented Django views, URL routing, and relational database models using MySQL.

Education

- Jul 2019 – Jul 2022 **Bachelor of Computer Applications (BCA)**,
Mats University, Raipur, C.G., CGPA – 7.6.

Projects

- Personal · Ongoing **OpenStream**, *Next.js, React, Tailwind CSS, yt-DLP, TMDB API, Cloudinary, Firebase*.
A subscription-free streaming platform inspired by Netflix. A nightly automation script detects catalogue changes, fetches updated trailers via yt-DLP, and auto-syncs them to Cloudinary — no manual intervention required. Includes user auth, profile management, and a cinematic browsing UI.
- Freelance **Sangatihit — Social Media**, *Node.js, Socket.IO, MongoDB*.
Real-time messaging platform with individual & group chats, online presence indicators, typing signals, and media sharing — inspired by WhatsApp's core communication experience.
- Personal **Shortly — Link Management Platform**, *Next.js, React, Tailwind CSS, MongoDB*.
Goes beyond basic URL shortening: features user auth with personal profile dashboards, full CRUD on links, search, and active/inactive toggling — giving users complete control over their link lifecycle.
- Personal **IP Address Tracker**, *Next.js, React, Tailwind CSS, ip-API, MapLibreGL*.
IP and domain intelligence tool resolving any address to geolocation, timezone, ISP, and server info. Features a GPS-accurate interactive map with smooth 2D/3D rendering via MapLibreGL.
- Personal **Dictionary Web**, *Next.js, React, Tailwind CSS, Dictionary API*.
Feature-rich dictionary app with categorised definitions (verbs, adjectives, proverbs), audio pronunciation, usage annotations, auto-search, and a built-in dark/light mode toggle.
- Personal **Alma Mater**, *NestJS, QR Scanning*.
Slot-based library attendance system — students join sessions and check in via QR code for seamless, contactless session management.
- Freelance **Social Media Automation Tool**, *Python, Selenium*.
One-click tool that logs in and auto-posts across multiple social media platforms simultaneously, eliminating repetitive manual workflows.
